European Master in Multilingualism and Education

The aim of EMME is to promote excellent teaching and high quality research that inspires both students and faculty. Critical thinking and analytical skills are stimulated in a program that provides key concepts and challenges of multilingualism and education. The Master encourages students to continue with a Ph.D. This European Master is organized in collaboration with the University of Groningen (Netherlands).

The student will:

- Develop a critical analytic attitude towards psycholinguistic, sociolinguistic and educational aspects of multilingualism and education
- Become a specialist at an advanced level in multilingualism and education
- Develop the capacity to solve problems related to multilingualism and education
- Acquire the ability to design multilingual educational systems in their sociolinguistic context
- Be capable to plan and implement innovation processes in different multilingual educational systems
- Become a skilful and qualified researcher in the area

Courses

The following courses are offered as part of the program. The first two courses are obligatory, among all others the students make a choice. Some courses are in English (E), some in Spanish (S) and some in Basque (B). The trainee-program and the Master thesis can be through one of the three languages.

1. Multilingual education: research perspectives (E)
